

INDUSTRY SOLUTIONS BY PROLOGA

PLANNING AND DISPATCHING

Optimize your logistics with PROLOGA: Industry Solutions by PROLOGA - Planning and Dispatching revolutionizes your logistics processes in waste management and beyond. This comprehensive and future-proof solution combines cloud-native architecture, intelligent planning and seamless SAP integration to optimize your processes. With powerful tools, it not only provides a comprehensive overview of orders and resources, but also automates complex processes and generates intelligent solution proposals. This allows you to save time, increase efficiency and make the best use of your resources, which is crucial for success in the dynamic world of waste management.

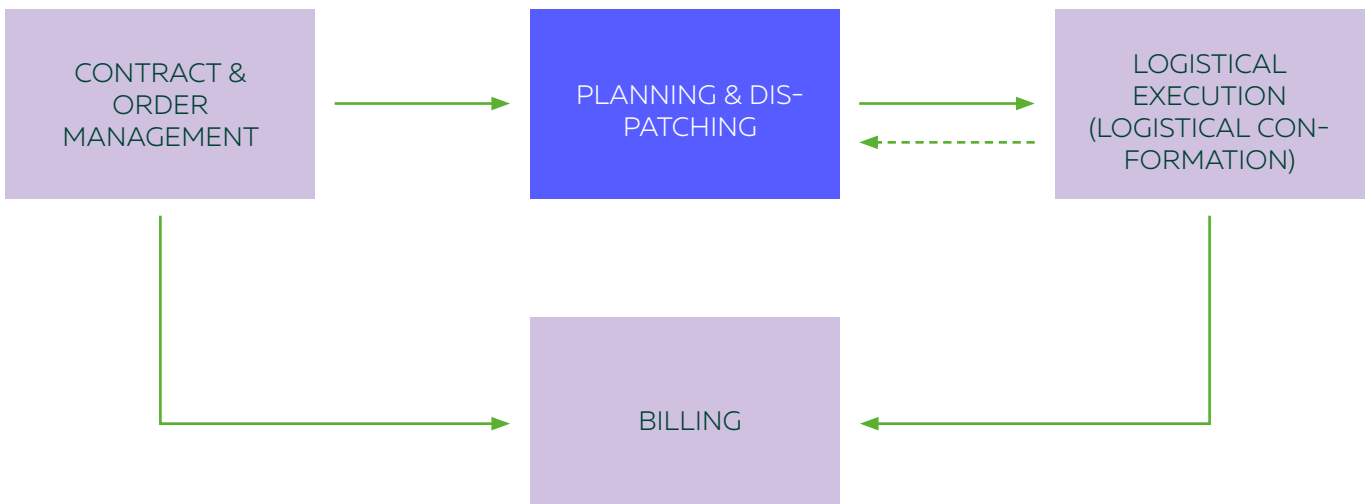

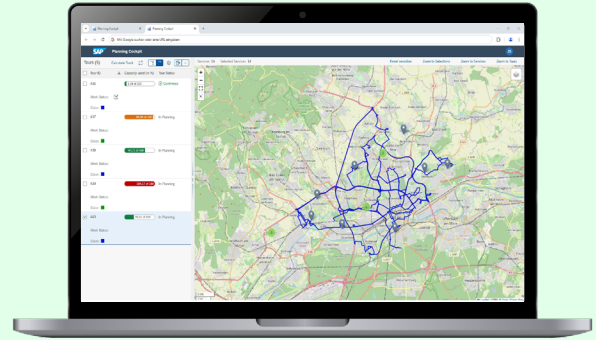

FEATURES

- 1. Cloud-native architecture**
The solution is developed for S/4HANA Public Cloud, but can also be used in hybrid scenarios. This enables flexibility in deployment and reduces maintenance costs.
- 2. Integrated order planning**
The system optimizes the arrangement of tasks in routes for efficient customer service. It takes into account various factors such as resource availability and customer requirements.
- 3. Dynamic adaptability**
The solution enables real-time responses to incidents and additional service requests during plan execution. This ensures flexible and efficient service delivery.
- 4. Modular and expandable structure**
The core functionality is independent of the type of service to be planned and can be adapted for different use cases. This enables a high degree of adaptability to your specific requirements.

ADDITIONAL BENEFITS

- **Cost reduction:**
Through digital processes and optimized use of resources.
- **Semi-automated planning:**
Enables adjustments to be made as required and significantly reduces the effort involved in daily planning.
- **Intuitive user interface:**
List and map views for maximum transparent.
- **Planning flexibility:**
Supports different order types in a dynamic environment
- **Sustainability promotion:**
Contributes to the reduction of CO2 emissions through route optimization.

Industry Solutions by PROLOGA - Planning and Dispatching offers a comprehensive and future-proof solution for optimizing service processes in the circular economy and beyond. By combining cloud-native architecture, intelligent planning and seamless SAP integration, it enables companies to make their services more efficient and increase customer satisfaction.
